

03/02/2023 BCarbon Stakeholder Meeting Zoom Chat

09:03:01 From David Valerio to Everyone:

Opening up the chat in Robin's stead! Feel free to drop any questions, comments, and other thoughts here.

09:34:05 From Pilloni, Giovanni to Everyone:

Besides the cost, there would be also a CO2 emission associated with the construction of the shoreline: what is the overall LCA of the project?

09:34:29 From Bob Hendricks to Everyone:

Might the Federal government provide subsidies for construction to make more projects feasible?

09:35:19 From Jschwartz to Everyone:

How will the difference between the SLAMM and actual sea level rise be reconciled if the credits have been already issued and bought?

09:35:49 From John Brooks to Everyone:

Great point!

09:36:28 From John Kane to Everyone:

Might be interesting to match this up with USDA Climate Smart Agriculture incentives, based on oyster harvesting. Assumes harvesting doesn't compromise integrity of the barrier. Might also tie in other aquaculture.

09:38:27 From John Brooks to Everyone:

Is BCarbon also allowing the use of NOAA data, and other standard survey methods to determine the stability of the marsh (aggradation, etc.) vs. RSETs?

09:39:11 From Sarah Swackhamer to Everyone:

A lot of good questions in the chat - we are a few slides away from the end of the presentation, then we can discuss all of them as a group!

09:55:27 From Sarah Swackhamer to Everyone:

absolutely!

09:56:46 From Anthony Colin to Everyone:

Thanks y'all!

09:56:51 From Ed Pinero; EcoMetrics LLC to Everyone:
great discussion!

09:56:55 From Beth Bader to Everyone:
Thank you!

09:56:59 From Ryan White to Everyone:
Thank you Jim and all. Keep this up.

09:57:06 From Julie Curry to Everyone:
Thanks. Effective deep dive!

09:57:16 From Jon Roberts to Everyone:
Thank you !!!

09:57:20 From Susan Adams to Everyone:
Great work! Thanks Jim and team!
